Ljubljana 14.7.2005

Dear Sirs!

This year GIREP (International Research Group on Physics Teaching) is organizing its 3rd Seminar from September 5 - 10, 2005 in Ljubljana, Slovenia. The head title of the Seminar is "Informal learning and public understanding of physics". The Seminar aims to bring together those who are involved in building bridges between physics and public. It will focus on identifying synergies between informal and formal forms of physics education. The Seminar hopes to bring together teachers, researchers in physics education, program and exhibits developers from science centres and scientists from universities in common aim to search for new ways of how to increase public appreciation and understanding of physics and thus improve the scientific culture of citizens.

Dr. Khalili Boroujeni has submitted his work "USING HISTORICAL MONUMENTS FOR INFORMAL TEACHING-LEARNING PHYSICS" for the 3rd GIREP Seminar in Ljubljana. This work was accepted for presentation by the international reviewing committee. This letter is intended as a recommendation for Dr. Khalili Boroujeni in obtaining visa to be able to attend the 3rd GIREP Seminar in Ljubljana. It would be quite a loss for the meeting if he could not come. The detailed program of the Seminar can be checked at <http://www.girep2005.fmf.uni-lj.si/>.

Sincerely yours,

dr. Gorazd Planinsic
Chairman of the 3rd GIREP Seminar
